tout à la fois exploration poétique et critique du processus d'écriture de Noëlle Renaude et réflexion à deux voix sur la création contemporaine. L'ouvrage cartographie les enjeux et les spécificités génériques poétiques et dramaturgiques de l'écriture théâtrale contemporaine commencée en 2010. Cette correspondance entre Noëlle Renaude et Barbara Métais Chastanier déborde la seule question de l'imprévu du hasard et de l'accident pour rendre compte des enjeux propres à l'écriture théâtrale contemporaine.

Written by a variety of experts on terrorism and extremism, this volume contains original cutting-edge essays that cover unusual aspects of these subjects and illuminate the significant developments and trends taking place in the field. The reader also examines some important case studies and offers new insights into topics of growing concern and pressing importance. Individual units examine domestic, international, cultic and atavistic terrorism, and the book concludes with a section on post-9/11 security concerns for intergovernmental organizations, national governments, policy analysts, law enforcement groups, scholars, and a society at large faced with the arrival of tumultuous times.

Les plans de carrière professionnelle ont de moins en moins de chances de se réaliser comme prévu de l'erreur d'orientation initiale au licenciement économique ou non en passant par les aléas privés. Les accidents de parcours sont plus fréquents et plus variés tout au long de la vie active et leurs effets diffèrent selon les causes et les modalités de prise en charge. Nos sociétés tardent à tenir compte de cette réalité née du ralentissement de la croissance, de l'assouplissement de la législation sur les relations employeurs-employés et de l'entrée massive des femmes sur le marché du travail. L'image de carrières stables avec un seul employeur

prédominante durant les années d'après guerre et soutenue par de nombreuses lois de protection de l'emploi continue d'imprégner les esprits comme les relations industrielles cet ouvrage dresse une typologie des accidents de carrière afin de mieux les comprendre et de définir des politiques pour les gérer
