this monograph examines the interrelationship between politics and modernist architecture in interwar belgium focusing on political architectural and administrative elites as propagators of new ideas of governance while belgium was strongly influenced by neighbouring france and germany it also developed its own avant garde approaches to socio political problems in the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings these buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament more specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts such experts and scientists constituted a rising elite of homines novi with strong though often veiled political ambitions as such this book contributes to our understanding of political culture in the age of extremes

we are entering the era of big data and machine learning can be used to analyze this deluge of data automatically machine learning has been used to solve many interesting and often difficult real world problems and the biometrics is one of the leading applications of machine learning this book introduces some new techniques on biometrics and machine learning and new proposals of using machine learning techniques for biometrics as well this book consists of two parts biometrics and machine learning for biometrics parts i and ii contain four and three chapters respectively the book is reviewed by editors prof jucheng yang prof dong sun park prof sook yoon dr yarui chen and dr chuanlei zhang
