the japanese translations of the hebrew bible history inventory and analysis tells the story of the translation of the bible into japanese against the background of the transplanting of christianity in japan it includes a detailed inventory of old testament translations with linguistic and theological analyses of choice verses

1 two main themes connect the papers on japanese syntax collected in this volume movements of noun phrases and case marking although each in turn relates to other

issues in syntax and semantics these two themes can be traced back to my 1965 mit dissertation the problem of the so called topic marker wa is a perennial problem in japanese linguistics i devoted chapter 2 of my dissertation to the problem of wa my primary concern there was transformational generative syntax i was interested in the light that chomsky's new theory could shed on the understanding of japanese sentence structure i generalized the problem of deriving wa phrases to the problem of deriving phrases accompanied by the quantifier like particles *mo demo sae* as well as *wa* these particles *mo demo* and *sae* may roughly be equated with a *so* or something like it and even respectively and are grouped together with *wa* under the name of *hukuzyosi* as a subcategory of particles in *kokugogaku* japanese scholarship on japanese grammar this taxonomy itself is a straightforward consequence of distributional analysis and does not require the mechanisms of transformational grammar my transformational analysis of *wa* and by extension that of the other *hukuzyosi* consisted in formally relating the function of the post nominal use of *wa* to that of the post predicative use by means of what i called an attachment transformation
